

## REMARKS

Support for the claims is found in the specification of parent application serial no. 09/118,168, which issued as U.S. Patent No. 6,117,858, at, for example, the following locations: for delivery to a tumor site, at page 12, lines 20-21; for a filmogenic protein, at page 7, lines 36-38; for a gas selected from a perfluorocarbon and SF<sub>6</sub>, at page 7, lines 5-7; for incubating the medicament with the microbubbles, at page 10, lines 18-20; for specific perfluorocarbon gases, at page 7, lines 13-15; for human serum albumin, at page 8, line 5; for administration without ultrasound, at page 6, lines 34-37; for intravenous administration, at page 12, line 38, and for a medicament which binds to the filmogenic protein, at page 10, lines 21-24, and page 11, lines 1-3. Applicants note that parent application serial no. Serial No. 08/670,999, which issued as U.S. Patent No. 5,849,727, contains similar disclosure of these elements.

Entry of the above amendments is respectfully requested. No new matter is added by any of the amendments.

Respectfully submitted,

Date: Sept. 22, 2003
